Re: Journal Broadcast Corporation
KYQQ(FM), Arkansas City, Kansas
Facility Identification Number: 37121
Special Temporary Authority

Dear Counsel:

This is in reference to the request filed May 8, 2009, on behalf of Journal Broadcast Corporation ("JBC"). JBC requests modification of the special temporary authority ("STA") granted on April 1, 2009, to operate Station KYQQ with emergency antenna facilities pursuant to Section 73.1680 following the collapse of its licensed tower.[1]

In support of the request, JBC states that, in order to provide for improved coverage from its emergency antenna operation, it proposes to increase the effective radiated power from 0.93 kW to 2 kW.[2]

Our review indicates that the proposed modification of STA would not extend the 60 dBu contour beyond the licensed contour.

Accordingly, the request for modification of STA IS HEREBY GRANTED. Station KYQQ may operate with the following facilities:

Geographic coordinates:	37° 44′ 7″ N, 97° 21′ 3″ W (NAD 1927)
Channel	293 (106.5 MHz)
Effective radiated power:	**not to exceed 2.0 kilowatt (H&V)**
Antenna height:	
above ground:	145 meters
above mean sea level:	545 meters
Above average terrain:	136 meters

[1] KYQQ is licensed for operation on Channel 293C0 (106.5 MHz) with effective radiated power of 100 kilowatts (H&V) and antenna height above average terrain of 390 meters.

[2] JBC mentions a separate STA request for a second emergency transmitter to provide service to the south central portion of the licensed coverage area; that request will be considered when received.

JBC must notify the Commission when licensed operation is restored. JBC must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **November 11, 2009**.

Sincerely,

Charles N. Miller, Engineer
