Re: Visionary Related Entertainment, LLC
KTBH-FM, Kurtistown, Hawaii
Facility Identification Number: 164281
Special Temporary Authority

Dear Counsel:

This is in reference to the request filed March 6, 2009, on behalf of Visionary Related Entertainment, LLC ("VRE"). VRE requests extension of the special temporary authority ("STA") granted on September 8, 2008, to operate Station KTBH-FM with reduced power.[1] In support of the request, VRE states that changes in the radio frequency environment at its multi-user site have resulted in field strengths outside the existing fencing in excess of FCC exposure standards when Station KTBH-FM is operating with full power. VRE states that the matter is complicated by the fact that it does not own the site and that it continues to explore its options. VRE requests extension of STA pending resolution of this problem.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has been prevented from restoring licensed operation due to causes beyond its control and has taken all possible steps to expeditiously resolve the problem. Thus, extension of STA is warranted.

---

[1] KTBH-FM is licensed for operation on Channel 271C2 (102.1 MHz) with effective radiated power of 50 kilowatts (H only) and antenna height above average terrain of -63 meters.

Accordingly, the request for STA IS HEREBY GRANTED. Station KTBH-FM may operate with reduced power. VRE must notify the Commission when licensed operation is restored. VRE must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **January 21, 2010**.

Sincerely,

Charles N. Miller, Engineer
