Subject: RE: STA Extension Request for W20CP-D

Mohammad:

In response to our further conversation this morning, we write to provide additional explanation for the STA extension requested in FCC File No. BSTA-20081208AEC. As I explained on the phone, our client, Northeastern Pennsylvania Educational Television Association ("NPETA"), requires extension of STA in order to complete construction of its permanent digital facility for W20CP-D.

NPETA had initially constructed and licensed the digital facility for W20CP-D in BLDTT-20081128ABW. However, due to the fact that the "flash-cut" CP was granted with an expiration date of November 29, 2008, NPETA was forced to construct the digital facility using temporary equipment while waiting for the manufacturer to deliver the permanent equipment.

NPETA expected that the permanent equipment for the digital facility would be delivered prior to the expiration of the current STA. However, the manufacturer recently informed NPETA that the equipment will not be delivered until the first week in July. Consequently, NPETA requires an extension of STA to allow it to complete construction of the permanent digital facility for W20CP-D. Once the permanent digital facility is complete, W20CP-D will no longer require extension of the STA.

Please let me know if you have any additional questions. Thanks again.

Subject: STA Extension Request for W20CP-D

Mohammad:

Pursuant to our earlier conversation, attached is a PDF copy of the of the STA request that we filed in FCC File No. BSTA-20090529ADT. The request seeks an extension of the granted STA in FCC File No. BSTA-20081208AEC. Unfortunately, due to an issue with CDBS, we were unable to file the request as an STA Extension.

Please contact us with any questions. Thanks again for your assistance.
