Re: KCVH-LP, Houston, Texas
File Nos. BMPTTL-20050817AAF
Facility ID No. 7079

Gentlemen:

By letter dated February 1, 2006, the staff dismissed the above-referenced application for minor modification of the licensed facilities of low power television station KCVH-LP (formerly K30CV). Gerald Proctor, the licensee of low power television station K30DN, Freeport, Texas, had opposed the application, asserting that the proposed facility would cause impermissible interference to the facility proposed in his previously-granted minor modification application.[1] Broadcasting Systems, Inc. (BSI), the licensee of KCVH-LP filed a timely petition for reconsideration.

We now have before us a Joint Motion for Approval of Settlement Agreement, filed on May 24, 2006, whereby Proctor withdraws his objection to grant of the above-referenced application. The parties have submitted affidavits stating that the settlement agreement complies with the requirements of Section 73.3525 of the Commission's rules, and further state that the public interest would be served by grant of BSI's application. In view of the foregoing, we will approve the Settlement Agreement and reinstate and grant the application.

Accordingly, the above-referenced application for minor modification of the licensed facilities of KCVH-LP IS HEREBY REINSTATED AND GRANTED, and the pending petition for reconsideration IS DISMISSED AS MOOT.

Sincerely,

Hossein Hashemzadeh
Associate Chief
Video Division
Media Bureau
