Re: Hispanic Christian Community Network, Inc.
K294BI(FX), Schulenburg, Texas
Facility Identification Number: 148127
Special Temporary Authority

Dear Counsel:

This is in reference to the request filed June 4, 2010, on behalf of Hispanic Christian Community Network, Inc. ("HCCN"). HCCN requests special temporary authority ("STA") to operate FM Translator K294BI with temporary facilities.[1] In support of the request, HCCN states that the licensed site has been lost.

STA requests which involve a change in transmitter site must include four critical elements: (1) Loss of the licensed site must be beyond the licensee's control; (2) STA facilities must continue to provide service[2] to the licensed community; (3) STA facilities must maintain, as closely as practicable, the licensed service area[3] without extending it; (4) STA facilities cannot involve the construction of towers intended for permanent use by the station requesting the STA.

Our review indicates that there would be a slight extension of the 60 dBu contour beyond the licensed contour toward the east; however, the proposed STA facilities would serve substantially the same area as the licensed facilities. Our review further indicates that Station K294BI has been silent since May 8, 2010, and thus faces the loss of its license if it does not resume broadcasting on or before May 8, 2011.[4]

Accordingly, the request for STA IS HEREBY GRANTED. Station K294BI may operate with the following facilities:

---

[1] K294BI is licensed for operation on Channel 294D (106.7 MHz) with effective radiated power of 0.05 kilowatt (H&V) and antenna height above ground of 65 meters.

[2] For AM - 5 mV/m; for commercial FM - 3.16 mV/m; for noncommercial educational FM - 1.0 mV/m.

[3] For AM - 0.5 mV/m contour; for FM - 1.0 mV/m contour.

[4] *See* 47 C.F.R. Section 74.1263(e).

Geographic coordinates:	29° 41′ 43″ N, 96° 51′ 25″ W (NAD 1927)
Channel	294 (106.7 MHz)
Effective radiated power:	0.05 kilowatt (H&V)
Antenna height:	
above ground:	50 meters
above mean sea level:	151 meters

It is anticipated that an application for construction permit for permanent relocation of the station will be filed prior to the expiration date below. HCCN must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **December 8, 2010**.

Notwithstanding the grant of this STA or the expiration date specified herein, the station's license will expire as a matter of law upon twelve consecutive months of silence. *See* Pub. Law No. 104-104, 110 Stat. 56, Section 403(1) (1996) and *Order, Silent Station Authorizations*, FCC 96-218 (released May 17, 1996). *See also Public Notice*, Expedited Processing of Applications Filed by Silent Stations, DA 96-818 (May 22, 1996). The licensee must notify the Audio Division immediately upon resumption of broadcasting.

STA Advisory: Section 309(f) of the Communications Act of 1934, as amended, authorizes the Commission to grant STA in cases of "extraordinary circumstances requiring temporary authorizations in the public interest and when delay in the institution of the temporary operations would seriously prejudice the public interest." However, Section 309(f) is not a means by which a licensee/permittee may circumvent established processing procedures which require the filing of an application, nor is it a means by which a broadcaster may enhance his facility or make operation more convenient for the broadcaster. Stations operating with less than licensed facilities under temporary authorities can be viewed as receiving the benefit of a larger protection area than that in which they are currently providing service.

Accordingly, Special Temporary Authorities by nature are to be temporary and are not intended for extended use. Licensees of stations operating under temporary authorities are reminded that timely restoration of permanent facilities is the responsibility of the licensee and should be undertaken expeditiously. Any request for extension of special temporary authorities carries an increased burden with each subsequent request.

Therefore, requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or

- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Sincerely,

Charles N. Miller, Engineer
