Re: WKRD(AM), Louisville, Kentucky
Facility Identification Number: 53587
CC Licenses, LLC
Special Temporary Authorization

Dear Mr. Langham:

This is in reference to the request filed June 8, 2010, on behalf of CC Licenses, LLC ("CCL"). CCL requests extension of the special temporary authority ("STA") granted on December 3, 2009, to operate Station WKRD with parameters at variance from licensed values and/or reduced power while maintaining monitor points within licensed limits, and with a temporary nondirectional antenna and reduced power.[1] In support of the request, CCL states that Station WZKF(FM) has filed an application for license to cover the construction permit which authorized its antenna to be installed at the WKRD site, and that Station WKRD is conducting a partial proof of performance on its antenna system. CCL states that a discrepancy between the tower location and the registration data is being resolved.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

[1] WKRD is licensed for operation on 790 kHz with 5 kilowatts daytime and 1 kilowatt nighttime, employing different directional antenna patterns during daytime and nighttime hours. (DA-2-U).

Our review indicates that the licensee has made substantial progress toward restoring licensed operation. Thus, extension of STA is warranted.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station WKRD may operate with parameters at variance from licensed values and/or reduced power while maintaining monitor points within licensed limits. Operation with a temporary nondirectional antenna and reduced power not to exceed 1.25 kilowatts daytime and 0.25 kilowatt nighttime also is authorized, only as necessary to facilitate the antenna construction work. It will be necessary to further reduce power or cease operation if complaints of interference are received. CCL must notify the Commission when licensed operation is restored.[2] CCL must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **December 30, 2010**.

Sincerely,

Charles N. Miller, Engineer
