In re: Claro Communications, LTD.  
KBRN(AM), Boerne, Texas  
Facility Identification No: 51961  
License application BL-20080729AHP  
Program Test Authority

Dear Mr. Benavides:

This is in reference to the above-captioned license application and request for program test authority (PTA) filed by Claro Communications, LTD (Claro).

A preliminary review of the application reveals that condition #1 on construction permit BP-20061227ABQ has not been met. Specifically, Claro did not submit all required daytime directional antenna full proof exhibits (for example, missing all directional measurement graphs and tabulation pages, daytime measured pattern polar plot, etc...). In addition, Claro indicated the station was operating per automatic PTA, but KBRN may not operate via automatic PTA because this case involves a directional pattern. As a result, Claro must file a request for Special Temporary Authority immediately to allow time to file an amendment. Finally, the NAD27 site coordinates on page 5 of FCC Form 301 were not rounded off to the nearest second, as required.

Accordingly, the request for PTA is DENIED. Further action on the application will be withheld for sixty (60) days to allow Claro to file a curative amendment. Failure to file a curative amendment or a response within this time frame will result in the dismissal of the application pursuant to Section 73.3568 of the Commission's rules.

Sincerely,

  
Son Nguyen
