Subject: WLIG-LD, Morristown, NJ (Fac. # 74513)

Importance: High

This notification is furnished by WLNY Limited Partnership, licensee of LPTV station WLIG-LD (formerly WLNY-LD), Morristown, NJ (Fac. # 74513), to inform the FCC that on February 1, 2010 the station temporarily suspended broadcasting because of a technical problem with its mask filter. The mask filter was shipped on February 5, 2010 to the manufacturer for repair or replacement. The FCC will be informed when the repaired or new mask filter is received and installed, and the station resumes regular broadcast operations.

This notification is being submitted by e-mail to the FCC staff, rather than by a paper filing, because of the closure of the FCC offices due to the snowstorm. The paper notification will be filed after the FCC offices reopen.
