Fresno, CA. 93650

Re: Facility ID: 31355
KWSM-LP - Santa Maria, CA.
Cocola Broadcasting Companies LLC
BDISDTL-20090821ADP

Dear Applicant:

On December 9, 2009, the licensee as addressed above was sent a 30 day deficiency letter outlining the following interference problems:

Our preliminary engineering review reveals that your proposed facility does not comply with the Commission's interference rules. Specifically, the proposal is predicted to cause interference to the following facilities:

KPMR BPCDT-20000427ABZ CH 21 Santa Barbara, CA.

You were given the opportunity to file a minor amendment to resolve the specified problem within (30) days from the date of that letter. Your amendment must be filed electronically. If not so amended, your application will be considered incomplete and subsequently dismissed.

Our records show that no amendment has been filed as of September 14, 2010, to resolve the above referenced interference problems. In addition, our current interference analysis shows the same interference issues still exist as outlined in the above letter.

Further review shows that you have filed a second displacement application BDISDTL-20100111AFL which was granted on June 8, 2010, and when filed supersedes the above referenced displacement application; therefore, as a result of the ongoing interference problems and the filing of a second now granted displacement application the above referenced displacement application BDISDTL-20090821ADP **IS HEREBY DISMISSED.**

Sincerely,

Hossein Hashemzadeh
Associate Chief
Video Division
Media Bureau
