Re: University of South Florida
WSMR(FM), Sarasota, Florida
Facility Identification Number: 64255
Special Temporary Authority

Dear Counsel:

This is in reference to the request filed December 20, 2010, on behalf of University of South Florida ("USF"). USF requests extension of the special temporary authority ("STA") granted on June 21, 2010, to operate Station WSMR with temporary facilities.[1] In support of the request, USF states that working to complete construction of modified facilities for Station WSMR authorized by Construction Permit BMPED-20101122AIW.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has made substantial progress toward restoring licensed operation. Thus, extension of STA is warranted.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station WSMR may operate with the following facilities:

Geographic coordinates:	27° 09′ 03″ N, 82° 27′ 51″ W (NAD 1927)
Channel	206 (89.1 MHz)

[1] WSMR is licensed for operation on Channel 206C2 (89.1 MHz) with effective radiated power of 50 kilowatts (H&V) and antenna height above average terrain of 141 meters.

Effective radiated power:	0.33 kilowatt (H&V)
Antenna height:	
above ground:	79 meters
above mean sea level:	82 meters
Above average terrain:	81 meters

USF must notify the Commission when licensed operation is restored. USF must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **August 4, 2011**.

Sincerely,

Charles N. Miller, Engineer
