Subject: KMCC STA Extension

Attached is a copy of the date-stamped proof of payment of the required application fees, submitted with our request for extension of Experimental Authorization for digital television booster station KMCC1-LD, FCC File Number BEXP-20100914AHV.

Cranston provides digital coverage of Cranston's community of license, Laughlin, Nevada, pursuant to license BLCDT-20081114ACI. The instant experimental booster STA provides service within the authorized full-service contour for KMCC-DT from a site located at Black Mountain, Nevada at the following coordinates: 35-56-43N, 115-02-32W (NAD27) and will not cause impermissible interference. KMCC would continue to operate its STA using a directional antenna with 5 kW ERP at the following elevation parameters:

Radiation Center AGL	57 meters
Radiation Center AMSL	1378 meters
