Re: KFAX (AM), San Francisco, California
Facility Identification Number: 24510
New Inspiration Broadcasting Co., Inc. ("NIB")
Special Temporary Authority

Dear Counsel:

This is in reference to the request filed September 27, 2006, on behalf of former licensee Golden Gate Broadcasting Co., Inc. ("GGBC"). GGBC requests extension of special temporary authority ("STA") granted on July 14, 2006, to operate Station KFAX with parameters at variance and/or reduced power while maintaining monitor points within licensed limits.[1] In support of the request, GGBC states that a construction project adjacent to the KFAX antenna array is expected to continue for at least two more years.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has been prevented from restoring licensed operation due to causes beyond its control and has taken all possible steps to expeditiously resolve the problem. Thus, extension of STA is warranted.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station KFAX may

[1] KFAX is licensed for operation on 1100 kHz with 50 kilowatts, unlimited hours, employing the same directional antenna pattern daytime and nighttime (DA-1-U).

continue to operate with parameters at variance and/or reduced power while maintaining monitor points within licensed limits. It will be necessary to further reduce power or cease operation if complaints of interference are received. NIB must notify the Commission when licensed operation is restored.[2] NIB must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **February 7, 2008**.

Sincerely,

Charles N. Miller, Engineer
