ICA may, not later than 30 days from the date of this letter, file a written statement to express its intention to seek authority to modify Station WIAA's technical facilities to attain minimum Class C HAAT; or, alternatively, as provided for by NOTE 4 cited above, otherwise challenge the triggering application. ³ In order to be considered in compliance with NOTE 4, the triggering application must: 1) be short-spaced to the Class C station, but be fully spaced if it were a Class C0; 2) include a certification that no alternative channel is available at the proposed location without any other changes to the table of allotments; and 3) be served on the licensee of the affected Class C station. The triggering application may utilize § 73.215, as is the case here.

WIAA's facilities, an acceptable application for a construction permit to increase the antenna height to at least 451 meters HAAT must be on file with the Commission 180 days subsequent to the show cause response due date. Failure to file a construction permit application within this time period will result in the automatic downgrade of WIAA's licensed facilities.⁴ Furthermore, ICA must serve REH with copies of any FAA submissions related to its efforts to modify the WIAA facility.

Further action on the subject application will be withheld for thirty days from the date of this letter to provide an opportunity to reply. Failure to respond to this letter will result in the automatic downgrade of WIAA's license pursuant to Note 4 of § 73.3573.
