Subject: Channel 48 STA for K12QZ-D San Luis Obispo, CA

Dear Mohammad,

The new CP for K12QZ-D Channel 12 moves the reference coordinates to 26.4 miles from the pending Channel 48 STA location. This is well within the 30 mile restriction. The Channel 48 STA would only be a temporary situation, giving the operators of Channel 12 who have lost their tower lease at the License coordinates, time to move their transmitter and antenna to the new CP location at Pismo Beach. The main reason this helps them is because the Owners have a site lease and all of the required equipment to broadcast on Channel 48 immediately, minimizing the the down time and keeping their programming on the air until the new modified facility is constructed.

respectfully,

Jimmy McPhetridge
