Re: CC Licenses, LLC
KCSJ(AM), Pueblo, Colorado
Facility Identification Number: 53846
Special Temporary Authority

Dear Applicant:

This is in reference to the request filed February 16, 2018, on behalf of CC Licenses, LLC ("CCL"). CCL requests special temporary authority ("STA") to operate station KCSJ(AM) with parameters at variance.¹

In support of the request, CCL states due to a night mode component failure the station is seeking authority to operate with parameters at variance from night mode licensed values. Thus, KCSJ(AM) is requesting STA for nighttime operation with parameters at variance until the station can secure replacement parts and the necessary repairs are made.

Accordingly, the request for STA IS HEREBY GRANTED. Station KCSJ(AM) may operate during nighttime hours with parameters at variance from licensed values and/or reduced power. No changes are proposed to the daytime operation. It will be necessary to further reduce power or cease operation if complaints of interference are received. CCL must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **August 20, 2018**.

STA Advisory: Section 309(f) of the Communications Act of 1934, as amended, authorizes the Commission to grant STA in cases of "extraordinary circumstances requiring temporary

¹ KCSJ(AM) is licensed for operation on 590 kHz with a daytime power of 1 kilowatt and a nighttime power of 1 kilowatt, employing different directional antenna patterns (DA2-U).

authorizations in the public interest and when delay in the institution of the temporary operations would seriously prejudice the public interest." However, Section 309(f) is not a means by which a licensee/permittee may circumvent established processing procedures which require the filing of an application, nor is it a means by which a broadcaster may enhance his facility or make operation more convenient for the broadcaster. Stations operating with less than licensed facilities under temporary authorities can be viewed as receiving the benefit of a larger protection area than that in which they are currently providing service.

Accordingly, Special Temporary Authorities by nature are to be temporary and are not intended for extended use. Licensees of stations operating under temporary authorities are reminded that timely restoration of permanent facilities is the responsibility of the licensee and should be undertaken expeditiously. Any request for extension of special temporary authorities carries an increased burden with each subsequent request.

Therefore, requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Sincerely,

Jerome J. Manarchuck
