SEE BACK OF CARD 10

WATERBURY, CONNECTICUT (WATR, INCORPORATED (WATR-TV, Channel 20)
APPLICANT TO CHANGE TV FACILITIES ADVISED NOTICE TO THE PUBLIC IS
INADEQUATE. The Commission has notified WATR, Incorporated, licensee of TV station WATR, Waterbury, Connecticut, that under the public notice requirements of Section 1.580 of the rules, its publication is defective. The application (BPCT-3888) to increase the antenna height to 1240 feet, change ERP to 792.5 kw visual, and move to a transmitter site about 8 miles south of Waterbury and make equipment changes is a "major change" under the rule. In addition, WATR was advised its program survey was limited to the City of New Haven, one of the major communities which will receive actual service. The Commission stated it is of the view that, "properly, the survey should include all new areas which would receive service" from the station for the first time. WATR was afforded thirty days to file the information. The application is opposed by Connecticut Television, Inc., licensee of station WHNB-TV, Channel 30, New Britain, which will be afforded fifteen days to file a responsive pleading to the WATR information. (By letter.)

About the History Cards …

History Cards were first used by the Department of Commerce to keep track of applications filed by, and changes to, the earliest AM broadcast radio stations in the early 1920s. The records were subsequently transferred to the Federal Radio Commission in 1927, and after that to the Federal Communications Commission when that agency was created in 1934. These cards gradually grew into a large card file.

TV History Cards were initiated in the early 1940s, with the authorization of the earliest TV stations. History Cards remained in use until the creation of the first computerized database in 1980 to track broadcast applications, the Broadcast Application Processing System (BAPS). However, the Commission did not transfer the data from the History Cards to the new system. Instead, it retained the History Cards in their original form for reference.

In 1999, the Commission moved to a new location (445 12th Street SW), and also at that time created the successor database to BAPS, the Consolidated DataBase System (CDBS). Prior to that move, the History Cards were transferred to microfiche by a contractor (only a few sets of microfiche exist), and the original paper cards were destroyed. The History Cards were stored on the microfiche as negative images, like those you see above.

History Cards contain very brief entries and notes about station facilities, applications, and ownership. They are not, and never were intended to be, a comprehensive record of a station's operations. Nevertheless, they can be useful to help determine, for example, when a station first went on the air and its call letters at that time. History Card comments were generally typed onto the cards, and thus some records will show more faintly or with more smudging than others, depending on the quality of typewriter and ribbon then used. Occasional handwritten comments, corrections, and strikeouts may also be found. Cards may be incomplete, missing, or occasionally out of sequence.

The History Cards are presented here as they were copied to microfiche, to preserve this record for public use, and with the hope that they will be of value to future researchers of television station history.
