In Re: BDSTA-20091228ABE  
KMCC(TV)  
Laughlin, NV  
Fac Id: 41237

Dear Licensee:

This is in response to your request for special temporary authority (STA) to operate TV station KMCC(TV), Channel 32, Laughlin, NV, with a power level less than that which was authorized by BLCDT-20081114ACI. You state that due to delays in obtaining permanent power delivery to your current site sufficient enough to power your 1000 kW facility, KMCC(TV) has had to operate with generator power.

After a thorough review of your technical specifications, we are persuaded that no interference is likely to occur from the proposed operation. We therefore conclude that the public interest would be served by the grant of this request. If problems do arise, we expect them to be solved expeditiously and the Bureau reserves the right to require the termination of the operation.

With respect to radio frequency radiation (RFR), we expect compliance with Section 1.1307(b) of the Commission's Rules to be achieved.

Accordingly, the request for special temporary authority IS GRANTED subject to the technical parameters and conditions specified below.

**Technical Parameters:**

Channel: 32

Antenna Coordinates: N. Latitude: 35-39-07  
W. Longitude: 114-18-42

Antenna Type: Dielectric Directional  
Model No. TFU-30DSC S180

Maximum Effective Radiated Power: 501.1 kW

Radiation Center Above Mean Sea Level: 1648 meters

Radiation Center Above Ground Level: 363 meters

HAAT: 607 meters

Tower Registration Number: 1211383

**Special Conditions:**

1. The grant of this construction permit is subject to the condition that, with ample time before commencing operation, you make a good faith effort to identify and notify health care facilities (e.g., hospitals, nursing homes, see 47 CFR 15.242(a)(1)) within your service area potentially affected by your DTV operations. Contact with state and/or local hospital associations and local governmental health care licensing authorities may prove helpful in this process. During this pre-broadcast period, you must provide all notified entities with relevant technical details of your operation, such as DTV channel, targeted on-air date, effective radiated power, antenna location, and antenna height. You are required to place in the station's public inspection file documentation of the notifications and contacts made and you may not commence operations until good faith efforts have been made to notify affected health care facilities. During this pre-broadcast period and for up to twenty (20) days after commencing operations, should you become aware of any instances of medical devices malfunctioning or that such devices are likely to malfunction due to your DTV operations, you must cooperate with the health care facility so that it is afforded a reasonable opportunity to resolve the interference problem. At such time as all provisions of this condition have been fulfilled, and either upon the expiration of twenty (20) days following commencement of operations or when all known interference problems have been resolved, whichever is later, this condition lapses.

2. The facility authorized herein must comply with the FCC's increased DTV coverage requirements by the date specified in Section 73.625(a)

3. This authority expires on September 26, 2010. If appropriate, a timely renewal request must be filed before the end of this period.

4. Hours of operation of this facility will be in accordance with Section 73.624(b) of the Commission's Rules

Sincerely,

A handwritten signature in black ink, appearing to read "Clay C. Pendarvis". The signature is fluid and cursive, with a large initial "C" and "P".
