In re: W291DD, Lexington, NC
BPFT-20181224AAP
Facility ID # 138258

Dear Applicant:

This refers to the above-captioned application for W291DD, Lexington, North Carolina.

An engineering study has revealed the application violates 47 C.F.R. § 74.1204(a) with respect to W291DM, Greensboro, NC (BMPFT-20180723ABE). Section 74.1204(a) states that an application for a FM translator station will not be accepted if the proposed operation would involve prohibited overlap of predicted field strength contours with any other authorized station. The proposed 40 dBu interference contour increases the overlap toward the 60 dBu protected contour of W291DM.

In light of the above, the application BPFT-20181224AAP is unacceptable for filing pursuant to 47 C.F.R. § 73.3566(a) and IS HEREBY DISMISSED. This action is taken pursuant to 47 C.F.R. § 0.283.

Sincerely,

James D. Bradshaw
Deputy Chief
