In the matter of: LightSquared Subsidiary LLC Request for Modification of Its Authority for an
Ancillary Terrestrial Component

To: The Federal Communications Commission

Re: FCC File Number: SAT-MOD-20101118-00239

I appreciate this opportunity to share my views on the upcoming broadband policy decision regarding LightSquared's request to modify their operational range with an Ancillary Terrestrial Component.

LightSquared's entry into the wireless broadband market could not have come at a better time as the spectrum crisis threatens to stifle innovation and the largest wireless providers have failed to offer truly open networks that encourage new applications and services. As the first wholesale-only nationwide 4G-LTE network complimented by satellite coverage, the company will create new jobs and new opportunities for innovation across a range of industries, including retailers, wireless providers, cable operators, device makers, content providers, and others.

Please keep these points, and the need for meaningful job creation, in mind as you review

LightSquared's proposal.

Respectfully submitted,
