Re:   FCC File No. SAT-MOD-20101118-00239;
      IB Docket No. 11-109

Dear Ms. Dortch:

   This is to inform you that on July 6, 2011, Martin Harriman,
Executive Vice-President, Ecosystem & Satellite Business, and Jeffrey J. Carlisle,
Executive Vice President, Regulatory Affairs and Public Policy, both of
LightSquared Subsidiary LLC (“LightSquared”), Richard Lee of Greenwood
Telecommunications, and the undersigned met with the Commission staff
members listed in the attachment hereto regarding the above-captioned
proceedings.

   The LightSquared participants discussed the Recommendation of
LightSquared filed on June 30, 2011, and the analysis and testing conducted by
the Working Group that investigated concerns regarding overload interference to
GPS receivers that may result in the presence of LightSquared’s operations.
Specifically, the LightSquared participants discussed the compatibility between
GPS receivers and LightSquared’s proposed terrestrial operation on the lower
10 MHz of its authorized L-band MSS spectrum, a full 23 MHz away from the
GPS frequencies, as discussed in greater detail in its Recommendation filed on June 30.

The LightSquared participants also discussed the steps it has proposed to accommodate users of precision and other wideband GPS receivers that may be affected by LightSquared’s proposed lower 10 MHz operations. The LightSquared participants stressed the need for precision GPS receiver manufacturers to cooperate with LightSquared to produce solutions that would enable the coexistence of LightSquared’s proposed LTE broadband network and precision GPS receivers that are designed to “listen” across the MSS L-band. In this connection, the LightSquared participants mentioned a recent letter from Samuel Allen, Chairman and CEO of John Deere, to Sanjiv Ahuja, Chairman and CEO of LightSquared, in which Mr. Allen made it clear that he saw no value in engaging in direct discussions toward a solution to address the potential overload of precision GPS receivers and that Deere & Co. would continue to oppose LightSquared’s proposed terrestrial deployment in any portion of LightSquared’s authorized L-band MSS frequencies.

Please do not hesitate to contact me with any questions.

Respectfully submitted,

Henry Goldberg
