Re: EX PARTE NOTIFICATION
FCC File No. SAT-MOD-20101118-00239;
IB Docket No. 11-109

Dear Ms. Dortch:

This is to inform you that on November 15, 2011, Martin Harriman, Douglas Smith, Geoff Stearn, and Jeff Carlisle (participating by telephone), all of LightSquared Subsidiary LLC (“LightSquared) and the undersigned met with Julius Knapp, Chief of the Office of Engineering and Technology, Mindel De La Torre, Chief of the International Bureau, Paul de Sa, Chief of the Office of Strategic Planning & Policy Analysis, and with the FCC staff members shown below, regarding the above-captioned proceedings.

The purpose of the meeting was to update the FCC staff on the status of LightSquared’s testing of filters and devices designed to permit the coexistence of LightSquared’s operations on the lower 10 MHz of its MSS L-band downlink band and to distinguish LightSquared’s financial commitment regarding federal precision and timing devices from any obligation to pay for the retrofitting or replacement of commercial precision and timing devices. Moreover, the
LightSquared representatives made clear that any determination that the federal precision and timing coexistence issue has been resolved would have to be based on objective and independent test results and not the subjective views of the federal agencies involved. Finally, the LightSquared representatives reiterated the benefits of its power on the ground proposal, which was presented to the FCC staff in prior meetings,¹ when compared to theoretical interference and propagation models.

Please do not hesitate to contact me with any questions.

Respectfully submitted,

Henry Goldberg
Counsel for LightSquared Subsidiary LLC
